Contents Volume 132

1 Premediation analysis of the energy taxation dispute in Finland
J. Bragge

17 Comments on properties of the minmax solutions in goal programming
W. Ogryczak

22 A Tabu search heuristic for the generalized assignment problem
J.A. Díaz and E. Fernández

39 On the efficacy of modeling multi-attribute decision problems using AHP and Sinarchy
L.C. Leung and D. Cao

50 Expansion formulae for characteristics of cumulative cost in finite horizon production models
H. Ayhan and S. Schlegel

62 Comparisons and evaluations of alternative approaches to the treatment of congestion in DEA
W.W. Cooper, B. Gu and S. Li

75 Alternative treatments of congestion in DEA: A rejoinder to Cooper, Gu, and Li
L. Cherchye, T. Kuosmanen and T. Post

81 Note: Alternative treatments of congestion in DEA – a response to the Cherchye, Kuosmanen and Post critique
W.W. Cooper, B. Gu and S. Li

88 Dual-based approach for a hub network design problem under non-restrictive policy
C.S. Sung and H.W. Jin

106 Inspection schedules when the lifetime distribution of a single-unit system is completely unknown
F.K.-n. Leung

116 Progressive hedging as a meta-heuristic applied to stochastic lot-sizing
K.K. Haugen, A. Løkketangen and D.L. Woodruff

123 An impulse control problem of a production model with interruptions to follow stochastic demand
J.L.F. Salles and J.B.R. do Val

146 The relationship between preventive maintenance and manufacturing system performance
D. Gupta, Y. Günalay and M.M. Srinivasan

163 Reliability bounds on HNBUE life distributions with known first two moments
K. Cheng and Y. Lam

176 Group preference aggregation with the AHP – implications for multiple-issue agendas
A. Chwolka and M.G. Raith

187 Design of the sum-of-conforming-run-length control charts
Z. Wu, X. Zhang and S.H. Yeo

PII: S0377-2217(01)00149-7

197 Optimal tax depreciation with uncertain future cash-flows
M. Berg, A. De Waegenaere and J.L. Wielhouwer
210 On a finite horizon production lot size inventory model for deteriorating items: An optimal solution
Z.T. Balkhi
224 A memetic algorithm for the total tardiness single machine scheduling problem
P.M. França, A. Mendes and P. Moscato
243 Guest Editorial: Data envelopment analysis at the European Summer Institute XVI, University of Warwick, Coventry, UK, 16–26 August 1998
R.G. Dyson, V.V. Podinovski and E.A. Shale
245 Pitfalls and protocols in DEA
R.G. Dyson, R. Allen, A.S. Camanho, V.V. Podinovski, C.S. Sarrico and E.A. Shale
260 Evaluation of deregulated airline networks using data envelopment analysis combined with principal component analysis with an application to Western Europe
N. Adler and B. Golany
274 DEA-like models for efficiency evaluations of specialized and interdependent units
L. Castelli, R. Pesenti and W. Ukovich
287 Product mixes as objects of choice in non-parametric efficiency measurement
L. Cherchye and T. Van Puyenbroeck
296 A quasi-concave DEA model with an application for bank branch performance evaluation
D. Dekker and T. Post
312 Measuring ecological efficiency with data envelopment analysis (DEA)
H. Dyckhoff and K. Allen
326 DEA with efficiency classification preserving conditional convexity
T. Kuosmanen
343 An application of DEA for comparative analysis and ranking of regions in Serbia with regards to social-economic development
M. Martić and G. Savić
357 Decomposing school and school-type efficiency
M.C.A. Silva Portela and E. Thanassoulis
374 Transconcave data envelopment analysis
T. Post
390 Techniques for the assessment of influence in DEA
J.L. Ruiz and I. Sirvent
400 Undesirable outputs in efficiency valuations
H. Scheel
411 An adaptive approach to controlling kanban systems
V. Tardif and L. Maaseidvaag
425 Generation and presentation of nearly optimal solutions for mixed-integer linear programming, applied to a case in farming system design
D. Makowski, E.M.T. Hendrix, M.K. van Ittersum and W.A.H. Rossing
439 Constructive and composite heuristic solutions to the $P//\sum C_i$ scheduling problem
J. Liu and C.R. Reeves
453 Solution of a large-scale two-stage decision and scheduling problem using decomposition
F. Al-Khayyal, P.M. Griffin and N.R. Smith
466 The multi-item single period problem with an initial stock of convertible units
E.A. Silver and I. Moon

479 Comparing the adaptive control methodology (ACM) to the financial planning practice of a large international group
P. Kunsch, A. Chevalier and J.P. Brans
490 Selection and sequencing heuristics to reduce variance in gas turbine engine nozzle assemblies
P. Johanns, T. Lowe and R. Plante
505 A taxonomy of strategic decisions and tactics for uncovering alternatives
P.C. Nutt
528 A flexible flowshop problem with total flow time minimization
M. Azizoğlu, E. Çakmak and S. Kondakci
539 A new Lagrangean relaxation approach for the hop-constrained minimum spanning tree problem
L. Gouveia and C. Requejo
553 A note on DEA vs principal component analysis: An improvement to Joe Zhu's approach
I.M. Premachandra
561 On the optimal management of a class of aquatic ecological–economic systems
A.A. Batabyal and H. Beladi
569 A quadratic programming approach to the determination of an upper bound on the weighted stability number
C.J. Luz and D.M. Cardoso
582 Analysis of upper bounds for the Pallet Loading Problem
A.N. Letchford and A. Amaral
594 A comparison of genetic and conventional methods for the solution of integer goal programmes
S.K. Mirrazavi, D.F. Jones and M. Tamiz
603 Dynamic capacitated user-optimal departure time/route choice problem with time-window
H.K. Chen, M.S. Chang and C.Y. Wang
619 Characterization of certain orders using their associated choice functions
I. Rodríguez-Galiano and J. González-Pachón
628 Optimal inventory policies under decreasing cost functions via geometric programming
H. Jung and C.M. Klein
643 Flow shop scheduling algorithms for minimizing the completion time variance and the sum of squares of completion time deviations from a common due date
K. Gowrishankar, C. Rajendran and G. Srinivasan
666 An investigation of model selection criteria for neural network time series forecasting
M. Qi and G.P. Zhang
681 Conditional investment policy under uncertainty and irreversibility
F. Yilmaz
687 Scheduling problems with a learning effect
G. Mosheiov
694 Intervention methodology for complex problems: The FAcT–Mirror method
G. Le Cardinal, J.-F. Guyonnet, B. Pouzoullic and J. Rigby
